## Electoral Boundaries <br> Commission Act

[R.S.B.C. 1996] CHAPTER 107 As amended by Electoral Boundaries Commission Amendment Act, 2005, S.B.C. 2005, c. 30

## Contents

## Section

1 Definition
2 Electoral Boundaries
Commission
3 Function of commission
4 Remuneration
5 Time of appointment of commission
6 Powers of commission
7 Employees
8 Appropriation
9 Determining boundaries
10 Report to Speaker
11 Hearings
12 Amendment of report
13 Report to Legislative Assembly
14 New electoral districts to be introduced by Bill
15 Power to establish electoral districts by regulation

## Definition

1 In this Act, "commission" means the Electoral Boundaries Commission appointed under section 2.

## Electoral Boundaries Commission

2 (1) The Lieutenant-Governor-inCouncil must, as required by this Act, appoint an Electoral Boundaries Commission consisting of
(a) a judge or a retired judge of the Supreme Court or the Court of Appeal who is nominated by the Lieutenant-Governor-inCouncil,
(b) a person who is not a member of the Legislative Assembly or an employee of the government and who is nominated by the Speaker of the Legislative Assembly, after consultation with the Premier and the Leader of the Official Opposition, and (c) the chief electoral officer appointed under the Election Act.
(2) The Lieutenant-Governor-inCouncil must appoint one member of the commission as chair.

## Function of commission

3 (1) The function of the commission is to make proposals to the Legislative Assembly as to the area, boundaries and names of the electoral districts of British Columbia.
(2) If the commission in carrying out its functions under subsection (1) considers that the number of electoral districts in British Columbia
should be increased, it may make proposals to the Legislative Assembly to increase the number of electoral districts up to a maximum of 85 .

## Remuneration

4 (1) The commission member who is a retired judge appointed under section 2 (1) (a) and the commission member who is appointed under section 2 (l) (b) may be paid remuneration for his or her services on the commission in an amount prescribed by the Lieutenant-Gov-ernor-in-Council.
(2) The commission members, while absent from their ordinary place of residence and in the course of their duties as commission members, must be paid their reasonable travelling and living expenses at the rates the Lieutenant-Governor-inCouncil may prescribe.

## Time of appointment of commission

5 (1) The next commission must be appointed no later than November 30, 2005.
(2) A new commission must be appointed no later than one year after the general voting day for every second general election following the appointment under subsection (1).

## Powers of commission

6 The commission and each member of it has, for the purposes of this Act, all of the powers conferred on commissioners under Part 2 of the Inquiry Act.

## Employees

7 The commission may
(a) employ or retain technical and other advisors and employees that it considers necessary, including a person to act as secretary to the commission, and
(b) subject to the approval of the Lieutenant Governor in Council, determine
(i) their conditions of employment, and
(ii) the remuneration and reimbursement for expenses to which they are entitled.

## Appropriation

8 Money required to meet the remuneration and expenses of commission members and of the persons referred to in section 7 may be paid out of the consolidated revenue fund.

## Determining boundaries

9 (1) In determining the area to be included in and in fixing the boundaries of proposed electoral districts, the commission must be governed by the following principles:
(a) that the principle of representation by population be achieved, recognizing the imperatives imposed by geographical and demographic realities, the legacy of our history and the need to balance the community interests of the people of British Columbia;
(b) to achieve that principle, the commission be permitted to
deviate from a common statistical Provincial electoral quota by no more than 25 percent, plus or minus;
(c) the commission be permitted to exceed the 25 percent deviation principle where it considers that very special circumstances exist.
(2) For the purpose of making proposals under section 3 (2), the commission must take into account the following:
(a) geographic and demographic considerations, including the sparsity, density or rate of growth of the population of any part of British Columbia and the accessibility, size or physical configuration of any part of British Columbia; (b) the availability of means of communication and transportation between various parts of British Columbia.

## Report to Speaker

10 (1) The commission, after considering any representations made to it, and within 12 months of the date on which the commission is appointed, must submit to the Speaker of the Legislative Assembly a report, which must delineate the number, which must not be less than 79 nor more than 85 , and the names, areas and boundaries of the proposed electoral districts.
(2) On receipt of the report under subsection (l), the Speaker must
promptly cause it to be made public and to be published in the Gazette.
(3) If the office of Speaker is vacant, the report must be submitted to the Clerk of the Legislative Assembly who must comply with subsection (2).

## Hearings

11 (1) The commission
(a) may before its report is submitted to the Speaker or to the Clerk under section 10, and (b) must after its report has been made public, hold hearings at the places and times it considers appropriate to enable representations to be made by any person as to the area and boundaries of any proposed electoral district.
(2) The commission must give reasonable public notice of the time and place and purpose of any public hearings to be held by it.

## Amendment of report

12 (1) The commission may, after considering any further representations made to it, and within 6 months of the date it submits a report under section 10 , submit to the Speaker any amendments to the report it considers advisable.
(2) The commission must give reasonable public notice of the time and place of any public hearings to be held by it.
(3) After the commission has heard from all other persons, it must give all
current members of the Legislative Assembly an opportunity to make submissions to it.
(4) The amendments must be made public and published in the same manner as the report under section 10 .
(5) If the office of Speaker is vacant, the amended report must be submitted to the Clerk of the Legislative Assembly, who must comply with subsection (4).

## Report to Legislative Assembly

13 (1) The report of the commission, together with any amendments to it, must,
(a) if the Legislative Assembly is in session when the report is submitted, be promptly laid before the Assembly, or
(b) if the Legislative Assembly is not then in session, be laid before the Assembly within 7 days after the commencement of the next ensuing session.
(2) If the report and amendments are completed when the Legislative Assembly is not in session, they must be delivered to the Clerk of the Legislative Assembly.

New electoral districts to be introduced by Bill
14 If the Legislative Assembly, by resolution, approves or approves with alterations the proposals of the commission, the government must, at the same session, introduce a Bill
to establish new electoral districts in accordance with the resolution.

Power to establish electoral districts by regulation
15 (1) If the Legislative Assembly is not in session, the Lieutenant-Gov-ernor-in-Council may, by regulation, establish the names and the areas and boundaries of the electoral districts from which the members of the Legislative Assembly are elected.
(2) The Lieutenant-Governor-inCouncil must not enact a regulation under subsection (1) unless the Select Standing Committee of the Legislative Assembly on Labour, Justice and Intergovernmental Relations has made a unanimous report to the Legislative Assembly recommending the names and specifying the areas and boundaries of the electoral districts.
(3) A report under subsection (2) must set out, with precision and clarity, the recommended names, areas and boundaries of the proposed electoral districts and the regulation under subsection (l) must be prepared and enacted accordingly.
(4) A regulation under subsection (l) that does not comply with subsection (2) has no effect.
(5) To assist the committee in preparing its report, the chief electoral officer and any public officers required by the chief electoral officer must, on the request of the chair of
the committee, assist the committee in the manner requested by the chair.
(6) A report under subsection (2) is deemed to be made to the Legislative Assembly if it is submitted to the Clerk of the Assembly.
(7) The government must, at the next ensuing session of the Legislative Assembly after the enactment of a regulation under subsection (1), introduce a Bill to establish the boundaries of the electoral districts, but only in accordance with the regulation under subsection (l).
(8) The Lieutenant-Governor-inCouncil must not, before the Bill referred to in subsection (7) is enacted, amend or repeal a regulation under subsection (l), and any regulation that purports to do so has no effect.
(9) The electoral boundaries established under or in accordance with this section remain in effect until they are adjusted or changed under the other provisions of this $A c t$.

## Appendix B

## Electoral Boundaries Commission Amendment Act, 2005 S.B.C. 2005, c. 30

HER MAJESTY, by and with the advice and consent of the Legislative Assembly of the Province of British Columbia, enacts as follows:

## [Sections 1-3, which amended the Electoral Boundaries Commission Act (see Appendix A), have been omitted.]

Transitional-Commission responsibilities in relation to electoral reform
4 (1) In this section, "single transferable vote system" means the electoral system recommended by the British Columbia Citizens' Assembly on Electoral Reform in its final report, issued December 10, 2004, and in its technical report, issued December 20, 2004.
(2) The commission appointed under section 5 (1) of the Electoral Boundaries Commission Act must, in addition to responsibilities assigned under that Act, make proposals to the Legislative Assembly, based on the single transferable vote system, as to
(a) the areas, boundaries and names of the electoral districts under that system, and (b) the number of members of the Legislative Assembly for each of those electoral districts.
(3) The report of the commission under section 10 of the Electoral
Boundaries Commission Act must
(a) as an exception to subsection (l) of that section, be submitted no later than August 15, 2007 , and
(b) include the proposals under subsection (2) of this section.
(4) Sections 11 to 15 of the Electoral Boundaries Commission Act apply in relation to the proposals included in the report under subsection (3)
(b) of this section.
(5) In carrying out its responsibilities under subsection (2),
(a) the commission must, in its proposals included under subsection (3) (b), propose the same number of members of the Legislative Assembly as it proposes under section 10 of the Electoral Boundaries Commission Act, and (b) if, by amendment under section 12 of that $A c t$, it changes the number of members from the number proposed under section 10 of that $A c t$, the commission must make the same change in relation to its proposals under this section regarding the single transferable vote system.

## Commencement

5 This Act comes into force on the date of Royal Assent.

# Appendix C 

Court Decisions Interpreting the Right to Vote

In Part 4 of this report, we discussed the leading Supreme Court of Canada decisions that have interpreted the right to vote guaranteed by section 3 of the Charter of Rights and Freedoms.

Several provincial trial and appellate courts have been faced with legal challenges to electoral boundaries legislation, or to boundaries drawn by commissions, and so have been called upon to apply the Supreme Court of Canada's general interpretation of s. 3 . We summarize these decisions in this appendix, as they provide some insight into how the courts have applied the Supreme Court of Canada's interpretation of the right to vote to specific fact situations.

## Alberta

In the 1991 Alberta Reference, ${ }^{72}$ the provincial legislation set out very strict redistribution rules. For example, there must be 83 electoral districts, consisting of 43 single municipality and 40 multi-municipality districts. The commission was required to consider geog-
raphy, comprehensibility, the number of municipalities involved, community interests, including those of aboriginal communities, population density and Charter rights. The Act permitted 25 percent deviation from the provincial average. It also allowed 50 percent deviation for 5 percent of the districts because of their sparse population, if they met criteria such as size, number of kilometres of highways, distance from Edmonton and maximum town population of 4,000 .

The Alberta Court of Appeal upheld the legislation, in spite of the "bewildering array" of rules. The 25 percent deviation did not constitute an undue intrusion upon voter parity, and the 50 percent deviation for 5 percent of the electoral districts was reasonable, having regard to sparsely populated areas and long distances to travel. The Court accepted that rural communities are a "community interest," and their existence warrants departure from voter parity:

Boundaries should respect the existence of that community interest. But that interest does not, of itself, justify deviations. The right of effective representation for rural voters does not mean they are always and everywhere to have divisions with lower populations.

The Court concluded with this comment:
The real issue may be not about adequate
representation of the less populated areas but under-representation of more populated areas. No argument for effective representation of one group legitimizes under-representation of another group. Arguments about the minimal size for ridings in lightly populated areas inevitably lead to the question why the legislature cannot accommodate both those requests and the demand for parity by enlarging the legislature. No doubt a legislature can be too large. But it also can be too small. And, in light of the rule in the Saskatchewan Reference case, the overall size of the legislature will, in the future, inevitably come under Charter scrutiny.

The electoral boundaries commission legislation that the Court had upheld in 1991 led to the appointment of a commission in 1992. The commission initially favoured "hybrid" districts that joined urban and rural areas, but subsequently backed away from that position because of strong public opposition. The five commissioners filed five separate final reports. A select committee of the legislature proposed an entirely new scheme that did away with hybrid districts. The legislature adopted the select committee's recommendations, and the 1993 election was conducted under those new boundaries. In 1994 the government asked the Alberta Court of Appeal to rule on the constitutionality of the 1993

[^1]
## boundaries (the 1994 Alberta

Reference. . ${ }^{73}$ The Alberta Civil Liberties Association intervened in the reference, contending that the un-der-representation of voters in inner city areas of Calgary and Edmonton constituted systemic discrimination against members of certain disadvantaged minority groups, namely the disabled, women, single parents, the elderly, immigrants, the poor and the unemployed who inhabited these areas in disproportionate numbers.

The Alberta Court of Appeal ruled that there was inadequate information before the Court for it to answer the constitutional question. However, it emphasized that:

- there is no permissible variation if there is no justification,
- the Court had not, in the 1991

Alberta Reference, blessed a general discrepancy between rural and urban divisions. Nor had it accepted the suggestion that areas in the province with a below-average density of population might expect, without more, to have electoral divisions with below-
average populations: "We did accept that the principles of fair representation might well lead to deviation. But we insisted that these must be established on a division-by-division basis,"

- the fact that a majority of Albertans did not like hybrid districts does not justify a Charter violation.

## Prince Edward Island

The Elections Act created 16 twomember electoral districts apportioned by county, as follows: Prince County (5), Queens County (6), and Kings County (5). In MacKinnon, ${ }^{74}$ a voter challenged the legislation under section 3 of the Charter. The evidence before the Court showed variances from plus 115 percent to minus 63 percent, far larger than in any other Canadian jurisdiction. In striking down the scheme, the Court noted that no other significant government services were delivered on a county basis. Not convinced that counties were, or ever had been, permanent political communities, the Court concluded that the legislative requirement for approxi-
mately equal county representation was arbitrary. There was no evidence that it was more difficult to represent rural than urban districts and, consequently, the goal of effective representation did not justify any appreciably lower voter population in rural areas based on a perceived difficulty to represent rural ridings.

Finding that the existing electoral distribution provided inadequate representation to a large percentage of the voters because of the significant variances in population in the electoral districts, the P.E.I. Supreme Court, Trial Division, concluded that MacKinnon's s. 3 rights had been infringed. The Court was then required to consider whether these infringements were "justified" under s. l of the Charter, which states:

> The Canadian Charter of Rights and Freedoms guarantees the rights and freedoms set out in it subject only to such reasonable limits prescribed by law as can be demonstrably justified in a free and democratic society. ${ }^{75}$

The Court was satisfied that the government's objectives of ensuring an

[^2]appropriate urban/rural and regional balance were "pressing and substantial," but was not satisfied that the means adopted in the legislation were proportional, because the dilution of voting power was unduly great - the map did not affect the rights of urban voters as little as possible. Echoing the words of the Alberta Court of Appeal, the Court concluded by stating:

In terms of effective representation, the real issue in this province may not be whether adequate representation is provided to the less populated areas, but rather whether the more populated areas are underrepresented.

The P.E.I. government subsequently appointed an electoral boundaries commission, which recommended that there should be 30 single-member electoral districts allocated by county (Kings (5), Queens (15) and Prince (10)), with a deviation maximum of plus or minus 15 percent. However, the Clerk of the Legislative Assembly then prepared an electoral map with only 27 districts, still allocated by county. The Legislative Assembly approved the commission's recommendations, except that there would be only 27 electoral districts and, in the future, boundary drawing would have to comply with a plus or minus 25 percent deviation rule. In

Charlottetown, the city challenged the variances in voter population and the distribution of constituencies, under sesction 3 of the Charter. The P.E.I. Supreme Court, Trial Division, dismissed the application, and the Appeal Division dismissed the appeal.

The Trial Division ${ }^{76}$ found that district deviations ranged from plus 21.1 percent to minus 19.9 percent. Similarly, rural areas of the province were over-represented ( 59 percent of seats with only 54 percent of voters), even though it had not been established that rural residents tended to rely more heavily on their MLAs. Nevertheless, the Court found that the scheme was not demonstrably unjustified, palpably wrong or manifestly unreasonable, and did not intervene.

On appeal, the Appeal Division ${ }^{77}$ made a preliminary ruling on whether the City of Charlottetown had the legal status to bring the appeal, since it was a corporation and the Charter, section 3 right applies only to "citizens." The Court ruled that the city had the necessary legal status, and stated:

8 In this context some deviance from voter equality may be tolerated for the greater good of all. On the other hand, unjustly
diminishing the voting rights of any group of individuals, such as urban voters, would obviously have an adverse impact on effective representation for their community as a whole and thus would weaken the democratic process that s. 3, as defined by the Supreme Court, was meant to protect and support.

On the appeal proper, ${ }^{78}$ a majority of the Appeal Division was satisfied that the variances between districts were well within the tolerances accepted by the Supreme Court of Canada in the Saskatchewan Reference case, and represented a very marked reduction in the over-representation of rural districts and under-representation of urban districts that was before the Court in MacKinnon. The Court stated:

37 Madam Justice McLachlin points out in the Dixon case that relative equality of voting power is the dominant principle underlying our system of representative democracy and is fundamental to the right to vote enshrined in section 3 of the Charter. She does not define relative equality of voting power, but she does state that "significant discrepancies" in the numbers of people represented by the members of the Legislature and members being "grossly overburdened" with constituents, as compared with another member, is not consistent with good government and may undermine the legitimacy of our system of government.

[^3]In upholding the scheme, the Court concluded that reasonable people applying the appropriate principles could have established the electoral boundaries under review.

## Northwest Territories

After the creation of Nunavut, 14 electoral districts were left in the remaining N.W.T. territory. The electoral boundaries commission recommended that the number of districts be increased to 16 by adding two districts to Yellowknife, in recognition of the fact that it had 44 percent of the territorial population, but only 29 percent of the electoral districts (the addition of two seats would give Yellowknife 38 percent of the electoral districts). The Legislative Assembly declined to add these two seats, and several individuals (including the Mayor of Yellowknife) and a voluntary organization (Friends of Democracy) sought a declaration that the legislation establishing the 14 districts violated their rights under section 3 of the Charter. The N.W.T. Supreme Court granted the declaration, and an appeal to the Court of Appeal was dismissed.

The Supreme Court ${ }^{79}$ ruled that there had been an undue dilution of the right to vote, without due justification, in the under-represented districts. The Court stated:

> 18 Considering the factors of geography, community history and interests, language differences, difficulties in communication with remote communities and minority representation, not to mention the normal difficulties and expenses of travel between the seat of government in Yellowknife and the various communities outside Yellowknife, I am satisfied that there probably is justification within the ambit of section 3 of the Charter for the present over-representation of the electoral districts whose percentage variations in population are below the average. On the other hand, I am unable to find similar justification for the gross under-representation of those other districts where the variations are markedly ( 25 percent or more) above the average. This gross under-representation must constitute a clear violation of section 3 of the Charter in the absence of due justification.

The N.W.T. government did not appeal, but several aboriginal interveners did. The N.W.T. Court of Appeal refused leave to appeal, ${ }^{80}$ observing that based on the evidence before the trial judge, he had come to the proper decision, and that an appeal would have little chance of success.

## New Brunswick

The federal electoral boundaries commission for New Brunswick proposed transferring two parishes from one electoral district to another. Residents of the parishes objected, arguing that as Acadians they had a community of interest, which would be harmed if they were transferred into an anglophone district. The commission rejected the argument, because not transferring the two parishes would have resulted in variances ranging from plus 14 percent to minus 21 percent, and the commission was determined to stay within plus or minus 10 percent, even though the legislation permitted variations up to plus or minus 25 percent. The Proclamation Order implemented the commission's recommendation that the two parishes be transferred, and the applicants applied to the Federal Court for judicial review.

The Court made two rulings. ${ }^{81}$ First, there was no violation of section 3 of the Charter. Finding a balance between the competing interests of voter parity and community interest is not an exact science, and the courts will respect the choices made by commissions if their decisions are de-

[^4]fensible. Here, the commission concluded that the plus 14 /minus 21 percent variances were too large and, applying the "reasonable persons" standard for judicial review, the Court should not intervene.

Second, the commission did violate the federal Electoral Boundaries Readjustment $A c t$, and its decision should be set aside. Section 15(2) of the Act authorized variances of up to plus or minus 25 percent but, by failing to consider that range (and refusing to exceed plus or minus 10 percent), the commission erred. It should have considered the full plus or minus 25 percent range, in order to accommodate the Acadian community of interest.

## Appendix D

## A Description of the Proposed BC-STV Electoval System

## BC's current electoral system

British Columbia is currently divided into 79 single-member electoral districts, for electing MLAs to the provincial Legislative Assembly. In an election, the candidate who receives the most votes wins and the political party that elects the most candidates forms the government. For most of our history, B.C. has used this electoral system. Proponents favour its simplicity, and its tendency to produce majority governments.

Opponents, however, contend that it is an unfair electoral system. A candidate does not need to receive at least 50 percent of the votes in his or her district to win. The political party that receives the most votes does not necessarily form government (as occurred in 1996). Each political party's share of votes is not necessarily reflected in its share of seats in the Legislative Assembly (as occurred in 2001).

## The British Columbia Citizens' Assembly on Electoral Reform

In April 2003 the Legislative Assembly unanimously established an independent, non-partisan Citizens' Assembly
on Electoral Reform, consisting of 161 members (one man and one woman from each of the 79 electoral districts, two First Nations members and the chair of the Citizens' Assembly).

The Citizens' Assembly identified three basic values that they believed should form the basis of our electoral system:

- Fair election results through proportionality: the number of seats won by each political party in an election should reflect as closely as possible the number of votes each party received;
- Effective local representation: each community needs the opportunity to choose the people who speak for it in the legislature, and to hold them accountable in democratic elections; and,
- Greater voter choice: citizens should have the fullest possible opportunity to choose the candidates that best represent their interests, among party candidates and across all parties.

After studying a variety of electoral systems used around the world, conducting 50 public hearings across the province and considering over 1,600 written submissions, the Citizens’ Assembly ultimately concluded that a single transferable vote (STV) system would best reflect these values, with several features unique to British Columbia, hence BC-STV.

Provincial referendum on BC-STV In May 2005, B.C. voted in a referendum on the Citizens' Assembly's recommendations. To pass, two thresholds had to be met. First, in at least 48 of 79 electoral districts, more than 50 percent of valid votes cast had to vote "yes" - that threshold was passed in 77 electoral districts. Second, at least 60 percent of valid votes cast provincewide had to vote "yes" - that threshold was not met, as only 57.69 percent voted "yes."

In April 2006 the provincial government announced that a second BC-STV referendum would be held in conjunction with the May 2009 provincial general election.

## The role of this Electoral Boundaries Commission

In 2005 the Legislative Assembly enacted the Electoral Boundaries Commission Amendment Act, giving this commission a second task in addition to its normal re-districting responsibilities - to make proposals based on the BC-STV system, as to:

- the areas, boundaries and names of the electoral districts under BC-STV; and,
- the number of MLAs for each of those electoral districts.

The commission is required to propose the same number of MLAs under the current electoral system and under the proposed BC-STV electoral system.

The commission has no preference for or against BC-STV, and has no authority to invite submissions about whether BC-STV should be adopted. It has a limited mandate, to draw proposed BCSTV electoral boundaries, which would be used in the 2013 provincial general election if the May 2009 BC-STV referendum passes.

## Key elements of the proposed BC-STV electoral system

Under BC-STV, there would be fewer electoral districts in B.C. Each district would elect between two and seven MLAs, and the number of MLAs might vary among districts. The Citizens' Assembly had recommended that districts should be designed to have as many MLAs as possible, because it is generally accepted that the more MLAs to be elected in a district, the greater the proportionality achieved.

Each voter would get only one vote, but the voter might express preferences for more than one candidate, by marking 1 , $2,3,4$, etc. beside candidates' names on the ballot paper, from most favourite to least favourite.

If the voter's most favourite candidate (\#l) received more votes than needed to be elected, or received the fewest votes and was eliminated, then some or all of that voter's vote would be "transferred" to his or her next favourite candidate (\#2). The vote would be transferred rather than wasted - hence 386
the "single transferable vote" electoral system.

## Public consultation

The commission invites public input on the key elements of its BC-STV boundary setting task:

- Should existing electoral districts be joined together to form BC-STV districts? If not, on what basis should BC-STV districts be drawn, and why?
- What geographic areas and/or existing electoral districts should be included in each BC-STV district, and why?
- How many MLAs (between two and seven) should be elected in each BCSTV district, and why?

## Voting under BC-STV

The voting description that follows has been adapted from the Technical Report of the Citizens' Assembly. Elections BC would be ultimately responsible for designing and conducting a province-wide BC-STV election.

## The ballot paper

Within each BC-STV electoral district, the ballot paper would display the names of all candidates contesting seats, grouped by political party affiliation. Each candidate running as an independent would have his or her own group. All candidates not indicating a party affiliation or that they were running as independents would constitute one group.

Within each group, candidates would have their rank order rotated at random, so that each candidate would have an equal chance of being placed in every position within the group.

The rank order of groupings would be rotated at random, so that each group would have an equal chance of being placed in every position on the ballot.

## Valid ballots

Voters would indicate their preference for the listed candidates by placing the numbers $1,2,3,4$, etc. next to candidates' names, with \#l representing the voter's first preference. To be valid, a ballot paper would have to show at least a first preference, or some other mark next to only one candidate's name which made the voter's intention clear.

The number of preferences beyond \#l would be at the voter's discretion, and could exceed the number of candidates to be elected.

A ballot paper with gaps or repetitions in the sequence of numbers beyond the first preference would be valid only up to the gap or the start of the repetition.

## Vote counting procedure within each electoral district

After establishing the total number of valid ballots, the minimum number of votes required for a candidate to
be elected would be calculated applying a formula. For example, in a fivemember district with 180,000 valid ballots, the minimum number of votes required would be 30,001 .

All ballots would be allocated according to each voter's \#l preference, and:

- if a candidate received 30,001 votes or more, then that candidate would be declared elected, and any "unused" portion of those votes would be transferred to those voters' second preferences. For example, if the successful candidate received 3,000 more votes than required, then the "transfer value" of $1 / 10$ of a vote would be transferred to those voters' second preferences; and,
- if no candidate received 30,001 votes, then the candidate with the fewest votes would be excluded, and all those voters' second preferences would be allocated among the other candidates, at full value.

Counting would continue according to this sequence until all the MLAs to be elected in the electoral district were elected:

- if the transfer of votes resulted in a candidate getting 30,001 or more votes, that candidate would be declared elected and any surplus would be transferred to the remaining candidates at their transfer value; and,
- if the transfer of votes did not result in any candidate getting 30,001 votes, then the candidate with the
fewest votes would be excluded; and,
- the voters who had voted for that candidate would have their full vote transferred to their next preferences; and,
- partial votes that had been transferred to that candidate would be transferred again, according to those voters' next preferences, at their transfer value.

## To learn more about BC-STV

To learn more about BC-STV or about electoral systems generally, check these websites:

## CSD Types

CY = City
$\mathrm{VL}=$ Village
DM = District Municipality
T = Town
$\mathbf{I M}=$ Island Municipality
RDA = Regional District Electoral Area
IGD = Indian Governmental District
NL = Nisga'a Land
NVL = Nisga'a Village
S-É = Indian Settlement

The SGC code provided in each table refers to the Standard Geographical Classification.

The SGC is Statistics Canada's official classification for three types of geogragraphic areas:

- provinces and territories
(first two digits);
- census divisions (digits 3 and 4, typically regional districts); and,
- census subdivisions (last 3 digits, typically municipalities and regional district electoral areas).

The SGC provides unique numeric identification codes.

In the example on the previous page:

- 59 refers to British Columbia;
- 33 refers to Tompson-Nicola Regional District, a census division (CD); and,
- 019 refers to Ashcroft, a municipality, a census subdivision (CSD).

    ${ }^{75}$ In R. v. Oakes (1986), 26 D.L.R. (4th) 200 (S.C.C.), the Court ruled that when the government seeks to justify a legislative measure that infringes $a$ Charter right, it must show that:

    - The objective relates to concerns that are pressing and substantial in a free and democratic society, and
    - The means chosen must be proportional, which has three components:
    - The measures adopted must be rationally connected to the objective, and must be carefully designed to achieve the objective in question,
    - The means should impair as little as possible the right or freedom in question,
    - There must be proportionality between the effects of the measures which are responsible for limiting the Charter right or freedom and the objective which has been identified as of sufficient importance.

    \# The 1996 population is taken from the Wood Commission report, which includes "block face" data where it was available. Clarification on block face data is available from BC Stats at http://www.bcstats.gov.bc.ca/data/cen96/ped96new/notes.asp and bttp://www.bcstats.gov.bc.ca/data/cen96/ped96new/Table1.pdf. Further information is also available in the Wood Commission: Report to the Legislative Assembly of British Columbia, December 3, 1998, page 11. The 2006 population is based on "enumeration area" data that is reviewed in the BC Stats notes.
    ** Deviation based on provincial electoral quotient of the same year.
    @ The Burquitlam electoral district includes people from the Coquitlam (22,331) and Burnaby (31,062) municipalities (2006 census). The population for Burquitlam bas been apportioned between the two, so the regional populations are correctly stated. The figures for 1996 are determined with the 2006 ratios for the two portions. The deviation and population change are based on the total Burquitlam electoral district population.
    All data (except for areas) prepared by BC Stats, Service BC.
